

Bamboo and Teeth Whitening: Enlighten Evo4

Brand Partners Information Sheet v3

A quick read, one page information sheet.

The Enlighten Evo4 teeth whitening treatment is one of the best teeth whitening treatments out there for guaranteeing results in a safe way.

What is Enlighten?

Enlighten is a professional premium teeth whitening system that guarantees results and can be done from the comfort of your own home in just three weeks.

Why Enlighten?

Enlighten is the only teeth whitening treatment that can guarantee results – Vita shade B1 or higher – in just three weeks. It requires no diet changes – Enlighten’s formula tackles the foods that other whitening products tell you to stay clear of, so yes you are able to drink red wine after. And you get longer-lasting results.

Who is suitable for Enlighten?

As with all of our teeth whitening treatments, a consultation with our dentist is needed first to help us understand whether you are dentally fit and whether Enlighten is suitable for you. It is a safe teeth whitening treatment, as long as it is carried out by one of our qualified dental professionals who have been trained in providing Enlighten. There are several unregulated over-the-counter teeth whitening products out there that can be dangerous for you. This is why you should always get teeth whitening from a qualified dental professional like us.

What are the steps?

First, we will get you in for a consultation with our dentist to assess your suitability. If it’s all good, then we will take a digital scan of your teeth to send off to Enlighten so that your personalised trays can be produced. Then you will come in to see our hygienist so that we can give you your Enlighten pack, ensure the trays fit and show you what to do. Some attachments on your teeth may be needed to ensure the effectiveness of the treatment. Then it is over to you. You will start your at-home treatment with the night gels for 14 nights. And then you will finish off your final week with the week-3 gel for one hour a day. You will then come back in to see us for a review to check you are happy with the results.

How white will my teeth be?

Enlighten guarantees Vita shade B1 which is the lightest, natural shade of white. If you don’t want the brightest shade, then you can stop the treatment whenever you are comfortable with the shade of your teeth. It is really in your control.

Will I need to top up?

With the top-up syringes, you can maintain the brilliant results indefinitely without having to cut out the red wines and coffees. Once you have completed the three weeks of whitening, you can top up 1 hour a month with the week-3 gel, or 1 night a month with the week-2 gel. You will also be given some specialised toothpaste.
